

✓ Runtime

🔍 WebAssembly Instance

✗ Input

```
graph BT; Input[✗ Input] --> Wasm[🔍 WebAssembly Instance];
```

The diagram illustrates the flow of input into a WebAssembly instance during runtime. A light green rounded rectangle represents the 'Runtime' environment, which contains a dashed white box for the 'WebAssembly Instance'. Below the runtime box is a red box labeled 'Input' with a red 'X' icon. A red arrow points from the 'Input' box to the bottom edge of the 'WebAssembly Instance' box, indicating that input is being fed into the instance.
