

✓ Runtime

🔍 WebAssembly Instance

✗ Input

```
graph BT; Input[✗ Input] --> Wasm[🔍 WebAssembly Instance]; subgraph Runtime [✓ Runtime]; Wasm; end
```

The diagram illustrates the flow of input into a WebAssembly instance during runtime. A light green rounded rectangle represents the 'Runtime' environment, which contains a dashed white rounded rectangle representing the 'WebAssembly Instance'. Below the runtime environment, a pink rectangle labeled 'Input' with a crossed-out shield icon has a pink arrow pointing upwards into the WebAssembly Instance.
